Australia has one of the most efficient chicken meat producing and processing industries in the world. Chicken meat is a hugely popular food amongst Australians, with consumers spending approximately $6.6 billion each year on chicken meat products.

Australia’s chicken meat industry is a vertically integrated industry, meaning that individual chicken processing companies generally own most elements of production – from breeding farms, hatcheries and feed mills to primary and further processing plants. However, the chicken rearing farms are generally owned by individual farmers who rear chickens under contract to the chicken companies. This is vastly different to the structure in other agricultural industries. The chicken companies provide farmers with one-day old chicks, feed and veterinary and farm management support. This unique structure creates an industry rich in diverse career, and career progression, opportunities.

WHERE A CAREER IN THE INDUSTRY COULD TAKE YOU

- **SCIENCE & ENGINEERING**
  - R&D
  - Engineer
  - Virologist
  - Geneticist
  - Diagnostics
  - Laboratory Technician
  - Environmental Scientist
  - Animal Scientist
  - Facility Design

- **FARM & LIVE BIRD MANAGEMENT**
  - Farm Manager
  - Administration
  - Project Manager
  - Hatchery Manager
  - Logistics and Planning
  - Business Management

- **POULTRY NUTRITION**
  - Nutritionist
  - Feed Milling
  - Raw Material Procurement
  - Raw Material Analysis
  - Delivery Logistics
  - Feed R&D and Feed Trial Management

- **AGribusiness**
  - Processing & Product Development
  - Sales & Marketing
  - Public Relations
  - Accounting/Human Resources
  - Government/Industry Advisor
  - Business Finance Management
  - Health and Safety
  - Lawyer

- **POULTRY HEALTH & WELFARE**
  - Veterinarian
  - Welfare Scientist
  - Welfare Officer
  - Auditor

- **FOOD SAFETY**
  - Quality Assurance Officer
  - Processing Plant Manager
  - Microbiologist

Chicken meat is the most environmentally sustainable of all meats, due to its highly efficient use of feed, energy and water to produce a kilo of chicken meat and less greenhouse gas emissions created.

The Australian chicken meat industry employs more than 40,000 people in metro & regional Australia in a diverse range of roles.

Almost all chicken meat sold in Australia is grown in Australia.

More than 1.23 million tonnes of chicken meat is produced annually.

Australians eat on average 49kg per person of chicken meat annually, which represents more than 44% of all meat consumed in Australia.
